ADSMAGNIFY ACADEMY

CASE STUDY

How We Built a Student Acquisition Funnel That Helped Adsmagnify Academy Complete 10 Batches

533 Leads → 70–80 Students → 10 Batches → ₹14L–₹16L Reported Revenue

The Challenge

Adsmagnify Academy was not looking to simply generate leads.

The real objective was to build a **repeatable student acquisition system** that could consistently bring potential students into the Academy, nurture their interest and convert them into paid students.

For a course business, the real journey is:

Attention → Interest → Enquiry → Follow Up → Enrolment → Batch

So instead of depending on a single campaign, we built a structured **Student Acquisition Funnel** using Meta Ads.

The Student Acquisition Funnel

Our strategy was built around different stages of the student journey.

01. AWARENESS

Academy Engagement Campaign

We introduced the Academy and its performance marketing education offering to the target audience.

02. CONSIDERATION

Content & Engagement

We used engagement campaigns to build familiarity and create a pool of people who had already interacted with the Academy.

03. REMARKETING

Academy MOFU Remarketing

People who had already shown interest were brought back into the funnel.

04. INTENT

Academy Lead Generation

High intent prospects were directed towards lead forms to enquire about the Academy.

05. CONVERSION

Sales Follow Up

Leads were followed up and moved through the enrolment process.

06. ENROLMENT

Paid Students

Students joined the Academy and were allocated into batches.

Campaign Period

April 1, 2026 to August 31, 2026

Platform: Meta Ads

For this case study, we have considered **only campaigns related to Adsmagnify Academy**.

No agency, client acquisition, D2C or other campaigns have been included.

Academy Campaign Performance

The Academy campaigns generated results across three important stages of the funnel.

Campaign Type	Result	Investment
Academy Lead Generation	533 Leads	₹27,012.16
Academy Engagement	176,359 Engagements	₹3,472.37
Academy Remarketing / Messaging	62 Conversations	₹4,781.32
Total Academy Investment		₹35,265.85

Important:

The **533** figure represents actual lead generation results from Academy lead campaigns.

The **176,359 engagement results are not counted as leads.**

The **62 messaging conversations are also not counted as leads.**

This keeps the case study commercially accurate.

The Lead Generation Result

Our dedicated Academy lead generation campaigns generated:

533 Leads

from:

₹27,012.16

in advertising investment.

Average Cost Per Lead

₹27,012.16 ÷ 533

=

₹50.68

So the dedicated Academy lead campaigns generated:

533 Leads at ₹50.68 CPL

But Leads Were Only One Part of the Funnel

The objective was never to celebrate a low CPL.

The objective was to turn the acquisition funnel into actual batches.

And that's where the business outcome becomes important.

During this period, Adsmagnify Academy completed:

10 Batches

with approximately:

7–8 Students Per Batch

That means:

Minimum students

$10 \times 7 = 70$ Students

Maximum students

$10 \times 8 = 80$ Students

So the Academy acquired approximately:

70–80 Students

Course Economics

Each student paid:

₹20,000

Therefore:

At 70 Students

$70 \times ₹20,000$

= ₹14,00,000

At 80 Students

$80 \times ₹20,000$

= ₹16,00,000

Reported Course Revenue

₹14,00,000—₹16,00,000

Total Marketing Investment

The complete Academy Student Acquisition Funnel used:

Engagement

Remarketing

Lead Generation

The total Meta Ads investment across these Academy campaigns was:

₹35,265.85

This is the number we use to evaluate the overall funnel economics.

Investment vs Return

Metric	Result
Meta Ads Investment	₹35,265.85
Dedicated Academy Leads	533
Cost Per Lead	₹50.68
Completed Batches	10
Students Per Batch	7–8
Total Students	70–80
Course Fee	₹20,000
Reported Revenue	₹14L–₹16L

Revenue Based ROAS

Now let's look at the return on advertising investment.

At 70 Students

₹14,00,000 ÷ ₹35,265.85

=

39.70X

At 80 Students

₹16,00,000 ÷ ₹35,265.85

=

45.37X

Therefore:

Revenue Based ROAS: 39.70X–45.37X

In simple terms:

For every **₹1 invested in the Academy's Meta Ads funnel**, the reported course revenue was approximately **₹39.70 to ₹45.37**.

Midpoint Scenario

Using 75 students as the midpoint:

$$75 \times ₹20,000 = ₹15,00,000$$

$$₹15,00,000 \div ₹35,265.85$$

=

42.53X

Cost of Acquiring a Student

This is one of the strongest metrics from the campaign.

Total funnel investment:

₹35,265.85

At 70 Students:

₹503.80 per student

At 80 Students:

₹440.82 per student

So the advertising investment worked out to approximately:

₹441–₹504 per student

against a:

₹20,000 course fee

Advertising Investment vs Course Fee

A student pays:

₹20,000

Average advertising acquisition cost:

₹441–₹504

That means the advertising cost represented approximately:

2.20%–2.52%

of the reported course revenue.

This is the key economics behind the funnel.

What We Actually Achieved

The success of the campaign was not one isolated metric.

It was the combination of:

533 Leads

generated through dedicated Academy lead campaigns.

₹50.68 CPL

achieved across those lead campaigns.

10 Batches

completed by the Academy.

70–80 Students

acquired across those batches.

₹14L–₹16L

in reported course revenue.

39.70X–45.37X

revenue based ROAS on the total Academy Meta Ads investment.

Why the Student Acquisition Funnel Matters

A traditional approach would look at:

How many leads did we generate?

Our approach looked further:

How many potential students entered the funnel, how many moved towards a conversation, and ultimately how many students did the Academy put into batches?

That changes the way performance is measured.

We didn't optimize only for leads.

We built a system around:

Reach

→

Engagement

→

Remarketing

→

Lead Generation

→

Follow Up

→

Enrolment

→

Batch Formation

This is the **Student Acquisition Funnel**.

Business Impact

Over the period covered by the campaign data, Adsmagnify Academy moved beyond individual campaign performance and established a repeatable acquisition model.

10 Batches Completed

70–80 Students

₹20,000 Average Course Fee

₹14L–₹16L Reported Course Revenue

Against:

₹35,265.85 Meta Ads Investment

The result:

39.70X–45.37X Revenue Based ROAS

Revenue Based ROAS

THE REAL WIN

We didn't just run Meta Ads for Adsmagnify Academy. We built a Student Acquisition Funnel designed to move people from awareness to interest, interest to enquiry and enquiry to enrolment.

The outcome: 10 batches completed, 70–80 students acquired and ₹14L–₹16L in reported course revenue from ₹35,265.85 in Meta Ads investment.

From Leads to Students. From Students to Batches. From Batches to Revenue.

That's the Adsmagnify Academy Student Acquisition Funnel.
