

MIRAGE SPA × ADSMAGNIFY

From 40 to 50 Annual Registrations

How a high intent Google Ads strategy helped a Canadian beauty education institute generate 1,020 conversions and leads and grow its annual registration benchmark by 25%

EXECUTIVE SUMMARY

Mirage Spa is a Canada based beauty and spa education institute offering professional training programs for aspiring beauty and wellness professionals.

The institute operates in a high value education category where a single student represents **CAD 11,000 in course revenue**.

When AdsMagnify began working on the acquisition strategy, the business had an annual registration target of:

40 STUDENTS

The objective was not simply to generate website traffic.

It was to create a predictable digital acquisition system capable of generating qualified enquiries and supporting student registrations.

The strategy centered around **Google Search**, where prospective students could be reached while actively searching for relevant beauty education programs.

The result was a measurable acquisition engine that generated:

1,020 conversions and leads

along with:

12,663 clicks

157,394 impressions

and:

CA\$24,035.66 in advertising spend

The business subsequently progressed from:

40 registrations in 2024

to:

45 registrations in 2025

and:

50 registrations in 2026

That represents:

25% GROWTH IN ANNUAL REGISTRATIONS

At a CAD 11,000 course fee, the registration increase represents **CAD 110,000 in additional annual tuition value** compared with the 2024 baseline.

ABOUT THE CLIENT

Mirage Spa

Mirage Spa is a Canadian beauty and spa education institute focused on professional training and career development within the beauty and wellness industry.

The business operates in a category where prospective students typically require significant consideration before enrolling.

A course valued at:

CAD 11,000

means that acquisition quality matters considerably.

The business therefore needed more than visibility.

It needed a system capable of consistently bringing prospective students into the admissions pipeline.

THE BUSINESS OBJECTIVE

The starting benchmark was straightforward:

40 REGISTRATIONS PER YEAR

The objective was to increase the number of students while creating a more measurable acquisition process.

Rather than measuring success only through impressions or clicks, the marketing strategy was built around a progression:

Demand

Capture people actively searching for beauty education.

↓

Conversion

Turn that intent into an enquiry.

↓

Lead

Generate a direct opportunity for the admissions team.

↓

Registration

Convert qualified prospects into students.

This distinction was important.

For a high ticket education business, **traffic is not the end goal. Student acquisition is.**

THE CHALLENGE

The problem was not simply generating traffic.

People considering an CAD 11,000 education program are unlikely to make a decision immediately.

They research different courses.

They compare institutions.

They search for specific specializations.

They evaluate their career options.

They look for information before contacting the institute.

This creates a fundamental acquisition challenge:

How do you reach prospective students when their intent is highest?

Our answer was to focus heavily on **search intent**.

Instead of trying to convince completely cold audiences that they needed beauty education, the strategy focused on people already demonstrating an interest through their searches.

THE ACQUISITION STRATEGY

01. Capture Existing Search Demand

Google Search was used as a primary acquisition channel because it allowed Mirage Spa to appear in front of prospects actively looking for relevant education and training opportunities.

This created a fundamentally different environment from interruptive advertising.

The prospect was already searching.

The brand needed to be there.

Don't create the intent. Capture it.

COURSE SPECIFIC CAMPAIGN STRUCTURE

The account included campaigns around different beauty education categories.

These included:

Esthetics

Nail Technology

Eyelash Courses

Beauty Courses

The account also contained campaigns focused on Canadian markets and dedicated Mirage Spa campaigns.

This structure allowed the acquisition strategy to respond to different areas of student demand rather than treating every prospective student as one generic audience.

CONTINUOUS CAMPAIGN OPTIMIZATION

The account was actively managed throughout the campaign period.

Campaigns were not simply launched and left running.

Different campaign structures were tested.

Underperforming campaigns were paused.

Some campaigns were removed.

New campaigns were introduced according to changing requirements and performance.

The 2025 account included multiple Search campaigns across different course categories.

This created a continuous optimization cycle:

Launch → Measure → Identify → Optimize → Scale

The goal was to continuously improve the efficiency and quality of acquisition.

THE 2025 GOOGLE ADS PERFORMANCE

The supplied campaign report covers:

6 January 2025 to 31 December 2025

During this period, the campaigns generated:

1,020

CONVERSIONS & LEADS

The conversion activity consisted of:

1,007 Lead Form Submissions

and:

13 Phone Call Leads

These are combined in the case study as the total conversion and lead figure of **1,020**.

TRAFFIC PERFORMANCE

The campaigns generated:

12,663

CLICKS

from:

157,394

IMPRESSIONS

This means the campaigns were not simply generating isolated enquiries.

They were creating substantial visibility and traffic within the relevant search ecosystem.

CONVERSION EFFICIENCY

Based on the reported figures:

1,020 conversions ÷ 12,663 clicks

8.05% CONVERSION RATE

That means approximately **8 out of every 100 clicks resulted in a tracked conversion.**

The reported advertising spend was:

CA\$24,035.66

This resulted in an average:

CA\$1.90 CPC

and approximately:

CA\$23.56 COST PER CONVERSION

THE PERFORMANCE DASHBOARD

Metric	Result
Impressions	157,394
Clicks	12,663
Conversions & Leads	1,020
Lead Form Submissions	1,007
Phone Call Leads	13

6Ad Spend	CA\$24,035.66
Average CPC	CA\$1.90
Conversion Rate	8.05%
Cost Per Conversion	CA\$23.56

The underlying Google Ads report supports the campaign activity and conversion figures shown above.

THEN WE LOOKED BEYOND GOOGLE ADS

This is where the case study becomes interesting.

A campaign can generate thousands of clicks and still fail commercially.

So the most important question was:

Did the business grow?

The registration numbers show a clear progression.

REGISTRATION GROWTH

2024

40 REGISTRATIONS

The original annual benchmark.

↓

2025

45 REGISTRATIONS

An increase of **5 students**.

2026

50 REGISTRATIONS

An increase of **10 students compared with 2024**.

THE 25% GROWTH

The business moved from:

40 → 50 registrations

Calculation:

$10 \text{ additional registrations} \div 40 \text{ baseline registrations} \times 100$

25% GROWTH

That is the core business outcome of the case study.

THE REVENUE IMPLICATION

Each course is valued at:

CAD 11,000

At 40 registrations:

40 × CAD 11,000

CAD 440,000

At 45 registrations:

45 × CAD 11,000

CAD 495,000

At 50 registrations:

50 × CAD 11,000

CAD 550,000

THE FINANCIAL PROGRESSION

Year	Registrations	Course Value	Annual Tuition Value
2024	40	CAD 11,000	CAD 440,000
2025	45	CAD 11,000	CAD 495,000
2026	50	CAD 11,000	CAD 550,000

The registration growth therefore represents a movement from:

CAD 440,000 → CAD 550,000

in annual tuition value.

That is:

CAD 110,000

additional annual tuition value compared with the 2024 baseline.

THE ROAS STORY

This is where we need to distinguish **reported advertising performance** from **business revenue economics**.

For 2025:

45 registrations × CAD 11,000

= CAD 495,000

Against reported Google Ads spend of:

CA\$24,035.66

The resulting revenue to advertising spend calculation is:

20.59X

Revenue Based ROAS

In practical terms:

Every CA\$1 spent on advertising represented approximately CA\$20.59 in 2025 tuition value.

However, this should be described as **revenue based or implied ROAS**, rather than Google Ads attributed ROAS, because the supplied campaign report does not establish that all CAD 495,000 in tuition value was directly attributed to Google Ads.

That distinction makes the case study more credible.

WHAT HAPPENED TO THE ORIGINAL TARGET?

The original benchmark:

40 registrations

became:

45 registrations

and then:

50 registrations

The business didn't merely hit the original number.

It moved beyond it.

10 additional annual registrations

At CAD 11,000 each:

CAD 110,000

in additional annual tuition value compared with the original benchmark.

THE COMPLETE CUSTOMER ACQUISITION STORY

The strategy can be viewed as a complete funnel:

SEARCH

Prospective students actively search for relevant courses.

↓

CLICK

Mirage Spa appears in front of relevant search demand.

↓

CONVERSION

The prospect takes an action.

↓

LEAD

The enquiry enters the admissions pipeline.

↓

ADMISSION

The prospective student moves through the institute's sales process.

↓

REGISTRATION

The student becomes an enrolled customer.

The Google Ads report gives us strong visibility into the first part of this funnel.

The registration figures show the broader business outcome.

WHY THIS CASE STUDY MATTERS

The interesting part is not that Mirage Spa generated 12,663 clicks.

Many agencies can generate clicks.

The interesting part is what happened to the **business benchmark**.

40 registrations

became:

50 registrations

while operating in a high ticket education category where each student represents **CAD 11,000 in course value**.

This demonstrates the importance of connecting media performance with business KPIs.

THE RESULTS AT A GLANCE

25%

Growth in Annual Registrations

1,020

Course Fee

CAD 495,000

2025 Tuition Value

20.59X

Revenue Based ROAS

CAD 550,000

2026 Tuition Value

CAD 110,000

Additional Annual Tuition Value vs. 2024

THE BEFORE AND AFTER

BEFORE

40 annual registrations

A fixed registration benchmark.

Limited room for growth without improving student acquisition.

↓

AFTER

50 annual registrations

A **25% increase** in annual registrations.

A measurable acquisition engine generating **1,020 conversions and leads**.

And a potential annual tuition value of:

CAD 550,000

THE BIGGEST LESSON

More advertising does not automatically create growth.

Better acquisition does.

For Mirage Spa, the strategy focused on reaching prospective students when they were already demonstrating intent.

Instead of optimizing purely for visibility, we focused on measurable conversion activity and continuously refined the campaign structure.

The result was a progression from:

40 → 45 → 50

annual registrations.

THE FINAL RESULT

40 registrations

2024

↓

45 registrations

2025

↓

50 registrations

2026

25% growth in annual registrations

1,020 conversions and leads

12,663 clicks
