JEEVAN SPARSH × ADSMAGNIFY

From Meta Lead Generation to 4 Completed Batches

How a focused Meta Ads strategy generated 678 course enquiries, supported 80 student enrolments, and delivered ₹4,00,000 in course revenue

About the Client

Jeevan Sparsh Holistic Medical Center conducts specialized training programs in **Samvahan Therapy**, an alternative therapy approach focused on holistic wellbeing and practical therapeutic techniques.

One of its key offerings is the **Samvahan Basic Course**, conducted in Alibaug and led by **Healer Suresh Nagarsekar**, a senior Samvahan Therapy trainer.

The course focuses on:

- Understanding Samvahan Therapy
- Natural techniques for pain relief
- Physical and mental balance
- Energy flow and Pranashakti awareness
- Practical training and guidance

- Personal development and community service

The course is positioned as a practical learning opportunity for individuals interested in understanding and practicing Samvahan Therapy.

The Business Challenge

For a specialized course like Samvahan Basic Course, simply generating awareness is not enough.

The real objective was to create a **consistent flow of course enquiries that could ultimately translate into filled batches.**

Jeevan Sparsh needed to:

Reach the right audience → Generate enquiries → Follow up with prospects → Convert students → Fill batches

The advertising strategy therefore had to focus on **lead generation rather than vanity metrics such as reach or engagement alone.**

The Objective

The primary objective of the Meta Ads campaign was:

Generate course enquiries at an efficient acquisition cost and convert those enquiries into students.

The acquisition journey was structured around:

Meta Ads

↓

Lead Form

↓

Course Enquiry

↓

Follow Up & Counselling

↓

Student Enrolment

↓

Batch Formation

The campaign was designed to create a scalable top of funnel for the course while keeping acquisition costs under control.

Campaign Overview

Campaign Period

1 July 2026 to 10 September 2026

Platform

Meta Ads

Campaign Objective

Campaigns Analysed

Campaign	Lead s	Spend	Cost Per Lead
AM Leads CBO July	412	₹14,078.73	₹34.17
AM Leads Med CBO August	16	₹3,270.76	₹204.42

AM Leads CBO August	250	₹7,879.25	₹31.52
Total	678	₹25,228.74	₹37.21

The campaign generated **678 lead form enquiries** from a total advertising investment of **₹25,228.74**.

The Numbers at a Glance

₹25,228.74

Total Meta Ads Investment

678

Lead Form Enquiries

₹37.21

Overall Cost Per Lead

135,966

Batches Completed

₹5,000

Course Fee Per Student

₹4,00,000

Total Course Revenue

15.85X

Revenue Based ROAS

The Real Business Outcome

Generating 678 leads is only one part of the story.

The more important outcome was what happened **after the leads were generated**.

Jeevan Sparsh successfully completed:

4 Batches

with:

20 Students Per Batch

That resulted in:

$4 \times 20 = 80$ Students

At a course fee of:

₹5,000 per student

the total course revenue generated from these enrolments was:

$80 \times ₹5,000 = ₹4,00,000$

This gives the campaign a much stronger business outcome than simply reporting the number of leads generated.

Investment vs Return

Advertising Investment

₹25,228.74

Student Enrolments

80

Course Fee

₹5,000

Revenue

₹4,00,000

Therefore:

Revenue Based ROAS

$₹4,00,000 \div ₹25,228.74 = 15.85X$

In simple terms:

For every ₹1 invested in Meta Ads, the campaign generated approximately ₹15.85 in reported course revenue.

This is a **revenue based ROAS** calculated from the **reported enrolments**, not a platform attributed ROAS from Meta Ads Manager.

Advertising Cost Per Student

One of the most important metrics for an education campaign is not just cost per lead.

It is:

How much did it cost to acquire a student?

Total advertising investment:

₹25,228.74

Total students:

80

Therefore:

₹315.36

was the average advertising cost per enrolled student.

Compared with the:

₹5,000 course fee

the advertising acquisition cost represented only:

6.31% of the course revenue per student

This created a strong acquisition economics for the campaign.

Lead to Student Conversion

The campaign generated:

678 leads

and the reported enrolments were:

80 students

Therefore:

11.80% Lead to Student Conversion

In other words, approximately **12 out of every 100 generated leads converted into students**, based on the reported campaign leads and enrolments.

This metric is important because it demonstrates that the campaign's success was not dependent solely on cheap leads.

The leads were followed through to an actual course enrolment outcome.

Revenue Generated Per Lead

Total reported course revenue:

₹4,00,000

Total leads:

678

Therefore:

₹589.97 Revenue Per Generated Lead

This provides another way to look at the economics of the campaign.

The campaign generated leads at an average cost of:

₹37.21

while the reported revenue generated per lead was approximately:

₹589.97

Month by Month Performance

JULY 2026

₹14,078.73

Advertising Spend

412

Leads

₹34.17

Cost Per Lead

July was the strongest month by lead volume, generating **412 enquiries**.

AUGUST 2026

₹7,879.25

Advertising Spend

250

Leads

₹31.52

Cost Per Lead

August improved efficiency further.

The cost per lead decreased from **₹34.17 in July to ₹31.52 in August**, representing approximately a **7.76% improvement in CPL**.

This indicates that campaign optimization was moving acquisition costs in the right direction.

SEPTEMBER 2026

₹3,270.76

Advertising Spend

16

Leads

₹204.42

Cost Per Lead

September data covers only **1 September to 10 September**, so it is a partial month and should not be directly compared with the complete July and August periods.

Campaign Performance Breakdown

Metric	July	August	September*	Overall
Spend	₹14,078.73	₹7,879.25	₹3,270.76	₹25,228.74
Leads	412	250	16	678
CPL	₹34.17	₹31.52	₹204.42	₹37.21
Impressions	80,592	42,760	12,614	135,966

*September represents data through 10 September 2026 only.

The Funnel

The campaign can be viewed as a complete acquisition journey:

META ADS

Targeted course promotion

678 LEADS

People submitted their details through Meta Lead Forms

FOLLOW UP

Prospects were contacted and moved through the conversion process

80 STUDENTS

Students enrolled into the program

4 BATCHES

20 students per completed batch

₹4,00,000

Reported course revenue

This is where the campaign moves beyond a traditional **lead generation case study**.

It becomes a **lead to enrolment acquisition case study**.

What Made the Campaign Economically Strong

The strongest part of the campaign was the relationship between:

Ad Spend → Student Acquisition → Course Revenue

The business invested:

₹25,228.74

in advertising.

That investment supported:

80 student enrolments

generating:

₹4,00,000

in reported course revenue.

The advertising investment therefore represented just:

6.31%

of the reported course revenue.

The Business Impact

Before the campaign

The challenge was to consistently attract prospective students for a specialized therapy training program.

During the campaign

Meta Lead Generation was used to create a steady flow of course enquiries.

Result

The campaign generated:

678 leads

which contributed to:

80 student enrolments

across:

4 completed batches

at:

₹5,000 per student

resulting in:

₹4,00,000 in reported course revenue

from:

₹25,228.74 in advertising investment

The Bigger Picture

The campaign demonstrates an important principle in performance marketing:

Cheap leads are not the end goal.

A campaign should ultimately be evaluated on its ability to contribute to a business outcome.

For Jeevan Sparsh, the journey was:

678

Lead Enquiries

↓

80

Students

↓

4

Completed Batches

↓

₹4,00,000

Course Revenue

↓

15.85X

Revenue Based ROAS

The campaign therefore created a measurable connection between **digital advertising and course sales**.

Key Performance Metrics

Business Metric	Result
Campaign Period	1 July to 10 September 2026
Platform	Meta Ads
Objective	Lead Generation
Total Spend	₹25,228.74
Total Leads	678
Overall CPL	₹37.21
Total Impressions	135,966
Students Enrolled	80
Batches Completed	4
Students Per Batch	20
Course Fee	₹5,000
Reported Course Revenue	₹4,00,000
Advertising Cost Per Student	₹315.36
Lead to Student Conversion	11.80%
Revenue Per Lead	₹589.97
Ad Spend as % of Revenue	6.31%
Revenue Based ROAS	15.85X

The Final Result

From ₹25K in Ad Spend to ₹4L in Course Revenue

Jeevan Sparsh's Meta Ads campaign generated **678 lead form enquiries** between 1 July and 10 September 2026.

Those enquiries supported the completion of **4 batches with 20 students each**, resulting in **80 reported student enrolments**.

At a course fee of ₹5,000 per student, that translates into:

₹4,00,000

Reported Course Revenue

against:

₹25,228.74

Meta Ads Investment

resulting in:

15.85X

Revenue Based ROAS

And an average advertising acquisition cost of just:

₹315.36

Per Enrolled Student

The Real Win

Jeevan Sparsh did not just generate 678 leads. It turned a ₹25,228.74 advertising investment into a reported ₹4,00,000 course revenue outcome, with 80 students across 4 completed batches.

Meta Ads That Drive Enrolments. Not Just Leads.
